

Dear Builder,

What a time to be alive! I mean, seriously—if you’re reading this, you’ve probably realized we’re living in an extraordinary era, one where visionaries, dreamers, and leaders like you are being called to build like never before. Whether it’s a business, a movement, a ministry, or even a family, the world is waiting for YOU. Yes, *you*, with the dreams so big they keep you up at night, the ideas that make you scribble on napkins, and the faith that keeps you pushing forward even when Netflix looks tempting!

But let’s be real for a second: *what does it actually mean to build?* And more importantly, *how do you build according to God’s divine blueprint?* Because, let’s face it—throwing up some bricks isn’t going to cut it if we’re talking about building a legacy that lasts.

Here’s the thing: this book isn’t just a “how-to” guide for dreamers or another motivational speech that’ll fade by next week. It’s a blueprint. For you—the visionary, the young leader who knows deep down that you’re meant for something BIG. You might be wondering, *Where do I even begin? What should I focus on? or Am I really the one for this job?* (Spoiler alert: Yes, you are!).

But let me let you in on a little secret: building is not just a possibility—it’s your *responsibility*. The King—God Himself—has placed a divine blueprint inside you. Yup, that’s right. There’s a custom-tailored plan for how you’re meant to live, lead, and create. And guess what? You’re already holding the first tool in your hand: this book.

Together, we’re going to unlock that divine plan and figure out how to build according to the design that’s been waiting for you all along. The foundation has already been laid—now it’s time to start stacking those bricks of faith, courage, and action.

So grab a coffee (or tea if you’re fancy), roll up your sleeves, and let’s get to work. Your blueprint is calling, Builder. Let’s answer it.

With a whole lot of love, faith and excitement,

Rejoice Azuka Uwuseba
Author, Builder, Fellow Dreamer
